Lifetime Pharmaceutical Services' expertise is to assist companies develop products for the existing mature market or develop product for the newer emerging market segments including functional foods, pet care, cosmetics and cosmeceuticals.

Contracting Manufacturing - OEM

Lifetime Pharmaceutical Services provides an easy step by step approach to complete OEM manufacturing in Australia.

All products are: -

- Manufactured in Australia or New Zealand
- Manufactured under the strict **GMP** (Good Manufacturing Practice) code
- Registered with the **TGA** (Australian Therapeutic Goods Administration)

We can also help you with or provide you with the following services.

- Product Development - concept and formulation.
- Contract Manufacturing – Tablets, Capsules (soft and hard shell), Creams & Gels, Liquids.
- Regulatory Compliance - Assistance with regulatory documents required for registration of products
- Packing Services for any type of product

Regulatory Compliance

Lifetime Pharmaceutical Services offers a full range of technical and regulatory advice to assist in securing product registration with government health authorities.

We have years of experience with most Asian markets (including Japan, Korea, Hong Kong, Taiwan, China, Singapore, Philippines and Malaysia), the Middle East, Europe and America.

Lifetime Pharmaceutical Services only works with manufacturers that have GMP compliance with the TGA (Australian Therapeutics Goods Administration), considered one of the highest levels of quality assurance available today.

Packing & Packaging Service

Lifetime Pharmaceutical Services provides a complete range of packing and packaging services.

Packing options available:-

- Glass/PET/HDPE bottles
- Blister packaging
- Cream Packing – Tube or tub formats
- Shrink-wrapping and Shrink sleeving
- Tamper-evident packing
- Induction sealing

Lifetime Pharmaceutical Services can also help with packaging design if required.

Quality Assurance

Lifetime Pharmaceutical Services work with companies that only commit to the highest standards of Quality Assurance and Regulatory Compliance set by the Australian Therapeutics Goods Administration (TGA). The TGA compliance for GMP manufacturers ensures that only the highest trained Quality Assurance and Technical Personnel are employed.

Quality Assurance is applied to all areas of manufacture, from raw material purity to encapsulation, bottling, labeling, shipping and accounting.

International and local testing procedures throughout the manufacturing process also ensure that the product meets the highest standards.

They include:

Sampling and Testing of all raw materials

- In-process testing
- Finished product testing
- Stability testing

All testing is conducted in either the manufacturers' in-house laboratories or external GMP laboratories accredited by the TGA.

This comprehensive approach to Quality Assurance management ensures that you will only receive the highest quality product available.
